Lynn Magnet Programs: Engineering, Multi-Media, Visual Arts

Our magnets offer a unique opportunity for students to focus on a specific interest for their three years of middle school, in preparation for high school, college and a rewarding career.

Lynn Middle School Engineering Magnet program students at the Space Center Houston during their trip to Houston and Galveston.

Lynn Middle School Magnet Programs

By Lynn Middle School Principal Kathie Davis

We are excited to be able to offer three separate career focuses through our magnets at Lynn – **Engineering, Visual Arts and Multi-Media**. The skills the students learn in our magnets will lead to rewarding careers in fields of their interests.

The **Engineering magnet** focuses on electrical, mechanical, civil and aerospace engineering. We are creating a lab especially designed for engineering applications, which will allow our students to excel when they enter college or the workforce.

The **Art magnet** is unique in its focus on art as a career as well as a form of expression. When visiting Sea World San Diego last year, we arranged a special tour of their scene development site. Our students felt validated seeing how the atmosphere of an amusement park is created through art and its applications. All mediums are explored: ceramics, photography, textiles (we have an industrial silk-screening machine), painting and drawing. The faux stained glass created in our summer art program will decorate our halls for years to come.

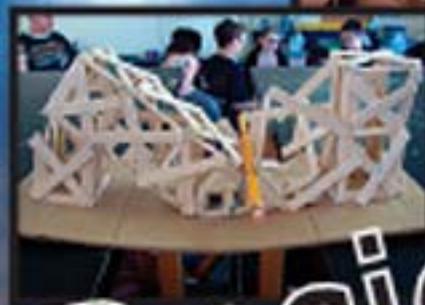

The **Multi-Media magnet** is instrumental in creating and contributing to the climate at Lynn. All media students try their hands at DJ-ing, advertising, computer animation and video editing, not to mention sharing the news through a school-wide broadcast each day. The software used to edit and create the animation is the industry's standard.

The Lynn Middle School Engineering

Our program wants all students to have a great learning experience by participating in creative hands-on/minds-on activities, projects, and field trips.

Motto: Dream, Design, Build!

Dream,

Design,

BUILD!

The Lynn Middle School Multimedia

Magnet offers a unique program for middle school students.

The *enhanced* curriculum is designed to give students experiences they would not necessarily receive in a traditional program.

Production

Take 2

Students enhance core curriculum knowledge through media production and its' processes.

Trips • Technology

This includes in and out of state field trips, advanced technology as well as radio, on-line newspaper and television production.

Lynn Middle School

Lynn Middle School was built in 1960 as Fred H. Lynn* Junior High School at a cost of \$783,500. An addition completed in 1961 added the library, music rooms, shop and gymnasium at a cost of \$237,500. The school occupies 17.59 acres on South Walnut Street, near Young Park.

Lynn celebrated its 50th year of service to Las Cruces students in 2010.

A \$2.075 million construction project completed in July 2010 remodeled the school gymnasium, added a new wrestling room and renovated the front office, exterior walls and outside courtyard. Work included replacing the wood floor, bleachers and exterior walls and windows; painting and installing new lights; painting locker rooms and installing new lockers; and repairing the east side exterior wall.

**Fred Lynn was superintendent of Las Cruces Municipal Schools 1924-25 and of the Union High School District 1925-37.*
